

Write a C program to print sum of digits.

① #include <stdio.h>

int main()

{

int num, sum = 0, digit;

printf("Enter a number : ");

scanf("%d", &num);

while (num > 0)

digit = num % 10;

sum = sum + digit;

num = num / 10;

}

printf("Sum of digits = %d", sum);

return 0;

}

Input: 234

Output: 9.

Input: 12345

Output: 15.

2) Write a C program to reverse given number

Using function.

#include <stdio.h>

int reverse number (int n)

{
int rev = 0, digit;

while (n > 0)

digit = n % 10;

rev = rev * 10 + digit;

n = n / 10;

}

return rev;

```

}
int main () {
    int num, result;
    printf("Enter a number:");
    scanf("%d", &num);
    result = reverseNumber(num);
    printf("Reversed number = %d", result);
    return 0;
}

```

Input:

1 2 3

Output:

3 2 1.

Write a C program to swap two numbers without using a third variable.

```

#include <stdio.h>

```

```

int main () {

```

```

    int a, b;

```

```

    printf("Enter values of a and b:");

```

```

    scanf("%d %d", &a, &b);

```

```

    a = a + b;

```

```

    b = a - b;

```

```

    a = a - b;

```

```

    printf("After swapping a = %d, b = %d", a, b);

```

```

    return 0;

```

```

}

```

Input:

a = 10, b = 20

Output

a = 20, b = 10
